CENTRAL LIBRARY MANAGEMENT SYSTEM

Date:23 September,2023

Changes needed for the library project:

- ➢ Add the publisher's address to the view book details.
- ➢ Allow for nullable authors, meaning some books may have both authors and editors, while others may have only one or the other.
- ➢ Include the editor's information in the "View All Books" section.
- ➢ Implement book title-wise search functionality on the landing page.
- ➢ Resolve the barcode range error in books with barcodes.
- ➢ Fix the issue with the "Edit Group Books" feature, as it is currently not functioning.
- ➢ Ensure that issued books do not appear in the book issue section.
- ➢ Modify the return book design: When there is a fine, only the fine button should be displayed; when the fine is not there and paid, then return buttons should be available.
- ➢ In all reports related to books authors and editors will be there.
- ➢ Include the Hitech logo on the library card.
- ➢ Create a table for authorized signatures.
- ➢ Display currency conversion from ABCD to INR.
- ➢ Add print, Excel, and PDF buttons to all reports.
